

## Choose the New England Surgical Training Facility That Delivers the Best Value

Until now, clinicians, researchers and medical device manufacturers had only one choice in New England when they wanted to conduct training in new orthopedic surgical procedures or in the use of new surgical devices. But that has all changed with the opening of the state-of-the-art Learning Center at the Orthopaedic Surgical Center of the North Shore in Peabody, MA. Our conveniently located Learning Center couples the latest technology with innovative operating room, lab and auditorium design to deliver an enhanced hands-on orthopedic surgical learning experience. We also can provide a range of surgical and event planning support staff and services to help ensure your training event exceeds expectations.

# The Learning Center at the Orthopaedic Surgical Center of the North Shore Is the Better Choice for Your Next New England Training Event

## STATE-OF-THE-ART FACILITY

The Learning Center at the Orthopaedic Surgical Center of the North Shore opened its doors in 2004 and features 1,350 square feet of brand-new learning, lab and operating room areas. The entire facility features exceptional interior design for maximum comfort, functionality and aesthetics. The Learning Center adjoins a 13,000 square foot ambulatory surgery center, which is available on weekends for larger training events and for real-time surgical observation.

**Auditorium.** The Learning Center auditorium features stadium-style seating that can accommodate up to 35 individuals.

**Wet Lab.** The lab area has two permanent two-person work stations equipped for use with cadaveric specimens and anatomical models. There is also a third portable station where up to six lab participants can work simultaneously.

**Operating Room.** The Learning Center also provides access to a large Class C operating room in the adjoining ambulatory surgery center.

**Audiovisual Connectivity.** Auditorium, wet lab and operating room are all connected with video and audio. Participants can observe surgeries being performed via four operating room cameras (two ceiling cameras, one camera mounted on the overhead light, and one camera in the scope). Observation and verbal interaction is possible among all participants in three separate areas simultaneously. The operating room/wet lab connection, in particular, is excellent for live demonstrations during which individuals can watch the techniques being performed and then perform the skills hands-on themselves.

## SKILLED ORTHOPEDIC SURGEONS & STAFF

The Learning Center is part of a 50,000 square foot orthopedic specialty center. Sports Medicine North, Inc., a 10-member orthopedic surgical group, is also on the site. All 10 Sports Medicine North surgeons are board-certified and fellowshiped in specific areas of orthopedic surgery. These surgeons regularly teach courses on behalf of companies and are available to assist your training team as instructors or to demonstrate their own surgical cases for observation from the auditorium. Additional experienced, highly trained surgical staff is available to help with planning, setup and assistance before, during and after your training event.

## EVENT PLANNING SERVICES

In addition to the services of highly skilled orthopedic surgeons and surgical staff, the Learning Center can also provide event planning services. Friendly and efficient Learning Center staff can assist you with transportation, hotel stays, catering and whatever else you may need to make your training event a complete success.

## CONVENIENT LOCATION

The Learning Center is located adjacent to a large upscale suburban shopping mall (the North Shore Mall in Peabody, MA at the junction of Rt. 95 and Rt. 128). There is plenty of free parking. Many restaurants and first-class hotels are just minutes away. Both downtown Boston and Logan International Airport are within a 25-minute drive.

## BEST OVERALL VALUE

No other surgical training facility in New England offers the complete combination of state-of-the-art facilities, equipment, highly-skilled surgeons, experienced surgical staff, event support and convenient location that you will enjoy at the Learning Center at the Orthopaedic Surgical Center of the North Shore. You owe it to yourself and your organization to give us a try.
