

*One Orthopedics Drive
Peabody MA 01960
978-818-6500*

Welcome!

We are committed to making your experience as positive as we can! We hope this patient information guide answers any questions you or your family may have regarding how you'll spend your day with us.

- ✚ Be sure any required referral/authorization from your PCP to the Surgeon's office is on file.
- ✚ Upon receiving this packet, please call Ellen Rostron @ 978-818-6514 to pre-register. It is very important that you call us to pre-register. This phone call verifies your general demographics and insurance information, as well as any co-payment requirements. When time allows, a letter is also mailed under separate cover to explain your co-payment requirement. The Orthopaedic Surgical Center of the North Shore collects co-payments at the time of service.
- ✚ Prepare for any Pre-Admission Testing requirements. If testing is required prior to your procedure, you will find a prescription in this packet ie: EKG, blood work. Failure to have this testing may result in the cancellation of your surgery.
- ✚ Prior to your surgical date you will hear from one of our nurses to conduct your pre-admission phone call. This telephone interview will provide us with necessary information about your health, and allow you a chance to ask questions about your operation. If there is a language barrier, please have someone available to translate.
- ✚ The night before your surgery you must not have anything to eat or drink after midnight, unless specified differently by the nurse who does your phone interview.

On your day of surgery...

- ✚ If you smoke, try to limit your smoking. This will make your post-operative recovery easier.
- ✚ Please do not wear jewelry.
- ✚ Do not wear contact lenses, as they may get lost, dry out, or scratch your eyes.

- ✚ Do not take any aspirin or other anti-inflammatory medication for 10 days before surgery. These drugs can interfere with the body's ability to clot and can actually increase the amount of bleeding before and after surgery.
- ✚ If you are on any medication – including over the counter drugs, and herbal supplements – be sure to ask your doctor whether or not you can continue taking that medication. And if not, how far in advance of surgery you must stop.
- ✚ You must arrange for **transportation to and from** the Surgical Center. Because you have drugs in your system, you will not be able to drive. It is illegal to do so.

Advance Directive

- ✚ While we at OSCNS respect the thinking and process that has gone into creating an Advance Directive, we **will not honor it** during your stay here. The majority of complications that arise from anesthesia or surgery that are performed here are almost always treatable. Therefore, OSCNS believes it would be unethical not to treat an eminently or potentially reversible complication.

At the Surgical Center

- ✚ *Your co-payment is expected at the time of your surgery. The Surgical Center accepts cash, check or major credit cards. Co-payment amounts vary with your insurance plan.*
Please also plan on bringing your insurance card(s) and a picture ID or 2 forms of ID, required by the FTC effective May 1, 2009.
- ✚ You will be asked to arrive about 1 hour before your scheduled surgery. This will allow the nurses and staff time to get you ready. You will be interviewed by the nurses, an anesthesiologist, and your surgeon. This evaluation seeks to address your questions, helps calm your fears and anxiety about anesthesia or surgery, and helps us plan your care.
- ✚ When all the preparation is done, you will be escorted into the operating room, where anesthesia monitors will be placed, including heart monitors on your chest, a cuff on your arm to monitor your blood pressure, and a soft rubber clip on your finger to monitor your oxygen level. You will be given extra oxygen by face mask or nasal prongs while you are in the operating room. Throughout the procedure you will be monitored closely to keep you both safe and comfortable.

After Surgery

- ✚ With the completion of surgery, the anesthesia team will bring you to the Recovery Room where you will continue to awaken fully. Recovery can take from one to several hours. Ideally, you will wake up with minimal to no pain or discomfort, but if you do experience pain, inform your nurse. You need not bear significant pain that is treatable. The recovery nurse will monitor you and treat you if other problems arise, such as nausea and vomiting. An anesthesiologist will be available to assist you in your recovery.

Going Home!

Our Surgical Center has certain criteria that you must meet before you can be discharged:

- ✚ You must have stable vital signs (heart rate, blood pressure, breathing rate, temperature, and pain level).
- ✚ You should be able to drink. Tolerating food and drink is very important because you may need to take oral medications for pain or to prevent an infection.
- ✚ You should be able to empty your bladder.
- ✚ You should be able to walk by yourself.
- ✚ You should receive discharge instructions and review them thoroughly with your nurse so you understand them clearly.
- ✚ A responsible adult must be present at the time of discharge to assist you home.

Follow-up

Tomorrow (or the next business day) one of our nurses will call to see how you're doing, and help answer any questions you may have.

What is an Ambulatory Surgical Center?

- ✚ The terms "ambulatory," "same-day", and "outpatient" surgery are all used to describe elective surgery where the patient arrives and returns home on the same day.
- ✚ More than 60% of elective surgery procedures in the United States are currently performed this way. Health experts project this percentage will increase to 75% over the next decade.

Thank you for letting us take care of you!

February 2009

Disclosure of Financial Interest at the Orthopaedic Surgical Center of the North Shore

Your surgery has been scheduled at The Orthopaedic Surgical Center of the North Shore, an ambulatory surgery center, which is located at One Orthopedics Drive Peabody, MA 01960.

Specific information regarding the date and time of your surgery and pre-surgical procedures is provided in a separate document.

The purpose of this letter is to inform you of some important facts regarding The Orthopaedic Surgical Center of the North Shore.

The Orthopaedic Surgical Center of the North Shore is specifically designed to accommodate surgical procedures which do not require the extensive facilities of a hospital operating room and for procedures which permit the patient to return home the same day.

This means the utilization of The Orthopaedic Surgical Center of the North Shore is more economical than the utilization of a conventional hospital operating room and, as a result, a recognized means of controlling the cost of health care.

You should be assured that The Orthopaedic Surgical Center of the North Shore is equipped with state of the art equipment and highly skilled professionals trained to provide medical care.

The Orthopaedic Surgical Center of the North Shore is owned in part by the physicians of Sports Medicine North. Your physician may be one of the owners of the The Orthopaedic Surgical Center of the North Shore.

The disclosure of your physician's ownership in The Orthopaedic Surgical Center of the North Shore is made for the purpose of informing you of the circumstances regarding the operation and ownership of The Orthopaedic Surgical Center of the North Shore. Should you have any questions or concerns regarding The Orthopaedic Surgical Center of the North Shore, please feel free to contact us at your convenience.

John Powell, CEO

Your Rights as a Patient

We consider you a partner in your care. When you are well informed, participate in treatment decisions, and openly communicate with your doctor and other health care professionals, you help make your care as effective as possible. Our Surgical Center encourages respect for the personal preferences and values of each individual. These rights apply to your representative in the event you are unable to exercise them.

Patient Rights include the following

You have the right to considerate and respectful care in a safe setting.

You have the right to receive compassionate care that respects your personal, spiritual, cultural and religious values and beliefs.

You have the right to privacy. The Surgical Center, your doctor and others caring for you will protect your privacy as much as possible.

You have the right to have your pain assessed and managed appropriately.

You have the right to be well informed about your illness, possible treatments and outcomes and to discuss this information with your doctor in a manner that is understandable to you.

You have the right to know the names and roles of people treating you.

You have the right to expect that treatment records are confidential unless you have given permission to release information or reporting is required or permitted by law. When the Surgical Center releases records to others, such as insurers, it emphasizes that the records are confidential.

You have the right to review your medical records and to have the information explained, except when restricted by law.

You have the right to consent to or refuse any treatment or plan of care, as permitted by law. If you refuse a recommended treatment, you will receive other needed and available care.

You have the right to have an advance directive, such as a living will or health care proxy. These documents express your choices about your future care or name someone to decide if you cannot speak for yourself.

You have the right to expect that the Surgical Center will give you the necessary health services to the best of its ability. Treatment, referral or transfer may be recommended. If transfer is recommended or requested, you will be informed of risks, benefits and alternatives.

You have the right to know if the Surgical Center has relationships with outside parties that may influence your treatment and care. These relationships may be with educational institutions, other health care facilities or providers.

You have the right to consent or decline to take part in research affecting your care. If you choose not to take part, you will receive the most effective care the Surgical Center otherwise provides.

You have the right to know about Surgical Center rules that affect you and your treatment and about charges and payment methods.

You have the right to review your bill, have the information explained to you, and get a copy of the bill.

You have the right to know about the Surgical Center's patient complaint and grievance processes that can help you promptly resolve problems and questions you may have about your care. You are encouraged to talk with your doctor, nurse, health care worker or an Administrator if you feel that you are not being treated in a fair and proper manner.
